

Dust it off, Fire it up, & Hit the road!

Saturday, May 1, 2010
10 am - 4 pm

It's almost time to dust off our cars, change the battery (or reinstall it), pour in a few gallons of fresh gas, and fire it up.

If it were that easy, hallelujah! But the newest car in the Club is still an antique. An antique that sits around a lot. Parts of them get a little crusty and cantankerous -- as do some owners. A common phrase we hear is, "But I just flushed the brakes...five years ago!" As our cars and we grow older, we tend to remember things as if they happened just yesterday.

Longtime VW gurus will teach you the ins and outs of your vintage VW in a way that you'll find refreshing and informative. We select cars for this clinic that seem the most needy. Secrets will be revealed by the masters of this craft!

Register now if you want your car checked out at this event. If you can, drive it in. If you can't, reduced-rate flatbed towing can be arranged. Cars will be serviced on a first-come, first-served basis, but rain checks will be available for Club members. If your car isn't road-ready, plan to come anyway and learn. We can help!

Remember, only adventurers find old abandoned VWs and drive them away. But those folks don't expect the car to run 100k miles. The rest of us need to use caution & care!
