

Qualifications

We have highly experienced techs who may have worked on your vintage car when it was NEW. The combined experience of our crew exceeds 140 years!

Free Technical Support

When you become our client, our resources are open to you. You can always ask questions (and, more importantly, get intelligent answers). We welcome you to visit our technical library, stocked with both original and updated manuals.

We service, sell and install the best parts and accessories

- Ate, FAG, TRW-Varga & Girling brake parts
- Bosch and Hella electronics
- Bilstein and Boge shocks and dampers
- Sony audio products
- West Coast Metric rubber parts
- Pertonix Ignition Systems

Also available

- Vintage appraisals
- Flat-Bed-Towing
- Rental cars on site
- Cash and carry parts discounts

We take the bugs out of your Beetle!

vintage munk's

All entrees include: personalized service, unmatched attention to details, and the highest quality ingredients.

Care Care Report

Since you love your vintage car, this comprehensive inspection will put your mind at ease. The cost is offset by a labor credit if you choose to have us service your car.

Engine Oil Change

We will clean or replace the oil strainer, straighten or replace the sump cover, replace the seals and install the proper sump nuts. No leaks!

Lubrication Service

We lubricate every moving part of your car that we can reach, including linkages, handles, hinges, pedals, the front axle beam, and on convertibles, the top mechanisms.

Tune-Up

After a thorough underhood inspection, we check compression, replace spark plugs, ignition points, set dwell and timing, then adjust your carburetor.

Cylinder Head Evaluation

During the valve adjustment, we have an opportunity to discover latent overheating by checking the lower head studs. It's inexpensive, and a great way to evaluate the rocker arms and adjustment screws.

Drinks

- Mobil One and Super lubricants
- Redline gear lubricants
- Castrol, Ate, and Pentosin fluids
- P21s wheel cleaner

Desserts

Precision Alignment

"No excuses" alignments with print out results for you to see. Our reputation for excellence draws people from five counties with loyal fans in all the local clubs.

Powder Coating

For added sweetness when you open your hood, consider powder coating in an original color or any color in the rainbow.

Stainless Steel Hardware

Like little diamonds, polished stainless steel is forever. When we detail your engine with stainless, it's the frosting on the cake.

Custom In-Car Electronics

Discreetly done on a vintage car, modern components can make your audio heavenly. It is a low fat treat that won't reduce the space between you and the steering wheel.

Zinc Coating

The rust bug will go hungry when corrosion-prone parts are prepped with a protective layer of zinc cold-galvanizing compound.

Epoxy

We prefer to seal floor pans on vintage Bugs & convertibles with West Systems epoxy. It is strong, water proof and lasts virtually forever.
